

- **JEM MFG has been in the commercial laundry business for over 30 years.** We will have experienced sales and service personnel evaluate your customer's facility.
- **We will implement the best system** for customer to save money on water, labor and linen.
- **JEM MFG will install a dispenser for each washing machine.** It will be calibrated based on customer's needs.
- **Routine Service:** JEM MFG Service Techs will inspect equipment every 6-8 weeks. Service Reports will be provided to the Customer, Distributor, and JEM MFG. The Service Report will show any adjustments made, any problems found, corrective action taken, and the quality of cleaning.
- **All Dispensing Equipment and Service Work** related to dispensers is provided free of charge while the customer is purchasing JEM MFG product.
- **Emergency Service:** will be provided within a 24-hour window.
- There will be a charge for visits dealing with any mechanical problems with customer's machinery (not related to dispensers).
- **Customer Types:** Hotel/Motel, Hospital, Nursing Home, Industrial, Educational, and Correctional Facilities.
- **Laundry Types:** Sheets, Towels, Rags, Pillow Cases, Personal Clothing, and Reclaim. Dispensers will have formulations set up for each type depending on customer's needs.

We can install systems for:

3 products: Built Detergent, Softener, Bleach

4 products: Detergent, Break, Softener, Bleach

5 products: Detergent, Break, Softener, Sour, Bleach

- **F-310 Wipe Out (Stain Remover)** will reduce the amount of reclaim laundry at your facility. It works great on most stains as long as they have not been dried and set-in. Made with patented ingredients. Non-hazardous. Safe to use on most washable fabrics. Can be set-up on machine as overnight reclaim cycle or can soak in a drum or sink. Great at removing petroleum based soils, including make-up, and works on everything.
- **Prism-Oxy Blend for colors.**

Laundry Program

Actual installed dispenser may differ.

www.jemmfg.com

Designed for 3, 4 & 5 Product Systems

3 Product System

Light Soil loads/Hospitality Industry

Make-up & reclaim laundry can be kept to a minimum with F-310 Wipe Out
Most Economical Process

1) F-684 or F-686 Built Detergent:
 A concentrated blend of surfactants, detergents, degreasing agents, sequestering agents, and alkalinity donors for use in industrial and commercial applications.

2) F-664 Softener:
 Leaves linens and clothes with a soft, smooth feel. It also helps reduce wrinkling while providing a refreshing fragrance.

3) F-660 Bleach 12.5 %:
 12.5% sodium hypochlorite solution used to restore white linens to their original brilliance in commercial laundry. Provides sanitizing action as well.

4 Product System

Heavier Soil Loads. Most Universal Process.

1) F-655 or F-686 Built Detergent:
 A concentrated blend of surfactants, detergents, degreasing agents, sequestering agents, and alkalinity donors for use in industrial and commercial applications.

2) F-656B Alkaline Break:
 Designed for use with F-655A or F-686 detergent, Alkaline Break builds alkalinity to help breakdown and loosen soils.

3) F-664 Softener:
 Leaves linens and clothes with a soft, smooth feel. It also helps reduce wrinkling while providing a refreshing fragrance.

4) F-660 Bleach 12.5 %:
 12.5% sodium hypochlorite solution used to restore white linens to their original brilliance in commercial laundry. Provides sanitizing action as well.

5 Product System

Heavy Soil Loads

A Laundry Sour is included to neutralize the fabric after wash
Primarily for Healthcare/Nursing Home Industries.

1) F-655 or F-686 Built Detergent

2) F-656B Alkaline Break

3) F-664 Softener or F-664S Softener/Sour:

Laundry Sour is specifically formulated to safely dissolve, lift, suspend, and remove iron and other metallic stains from linens. This product also neutralizes any alkaline detergent residues, which reduces the possibility of skin irritation.
 ← Pre-blended as F-664S or standalone F-654 →

4) F-654 Laundry Sour

5) F-660 Bleach 12.5 %
